

Glastherm® Grade HT200

- High Hot Compressive Strength
- Low Thermal Conductivity
- Oil and Moisture Resistant
- Reduces Heat Loss
- Helps Control Temperature
- Faster Mold Startup

Glastherm Grade HT200 insulating material is ideally suited for reducing heat losses from plastic and zinc die cast molds with operating temperatures up to 550° F. Its thermal insulating capability provide faster startups and increased operating efficiency while its high strength provides long service life.

It is completely asbestos-free and rugged to withstand rough handling during installation. It is easily cut and machined with standard metal working equipment. Diamond cutting tools are recommended for long life.
